Who uses Relay

One persona per role at Kopano Freight. Fictional people, based on the jobs in our brief.

S1-03 · Sprint 1

TM Thabo Mokoena

Long-haul truck driver, 38

Role: Staff | City Deep depot | Android phone, prepaid data

> “I just want to know someone got my message and when it will be sorted.”

GOALS

- Report a problem from the cab in under 2 minutes
- Get fuel card and payslip issues fixed without driving to the office
- See what is happening without phoning around

FRUSTRATIONS TODAY

- WhatsApp messages to the office get lost in the group
- Nobody answers the depot phone before 08:00
- Doesn’t know whether HR or Finance handles his problem

RELAY MUST

Work on a small phone with weak signal, ask only what’s needed, and give him a reference number.

NK Nomvula Khumalo

IT support agent, 29

Role: Agent | Head Office, covers depots | Laptop, two screens

> “Half my morning is reading HR emails that should never have reached IT.”

GOALS

- See only IT requests, most urgent first
- Reply fast with consistent, correct answers
- Know when a request was sent to the wrong team

FRUSTRATIONS TODAY

- Shared inbox mixes HR, IT and Finance mail
- Types the same Wi-Fi and password answers every day
- Vague requests like “help please” with no details

RELAY MUST

Sort her queue, draft replies she can trust and edit, and let her move misrouted tickets in one step.

LD Lerato Dlamini

HR manager, 44

Role: Manager | Head Office | Laptop and phone

> “Every month-end we drown, and I only find out when staff complain to the director.”

GOALS

- See request volumes and response times for her team
- Spot month-end surges before they hit
- Sign off purchases and leave quickly

FRUSTRATIONS TODAY

- No numbers on how many requests HR gets or how long they take
- Hears about delays from complaints, not data
- Approvals wait in her email for days

RELAY MUST

Show clear numbers and trends (Sprint 2–3) and put approvals in one place (Sprint 4).

SN Sizwe Ndlovu

Risk and compliance officer, 51

Role: Compliance | Head Office | Laptop

> “If an AI writes to our staff, I need to see what it said and who approved it.”

GOALS

- Trace every AI decision: what it chose, how sure it was, who checked it
- Make sure personal information is only seen by the right people
- Report AI risks to the board

FRUSTRATIONS TODAY

- AI tools that act like a black box
- No record of who saw a staff member’s payslip query
- Policies that exist on paper but not in the system

RELAY MUST

Keep every AI draft and decision, label AI output, and enforce who can see what (Sprint 1 rules, Sprint 3 reports).
