Wireframe review

Relay · S1-11 · 2–3 colleagues from outside the team who haven't seen the wireframes Date: _____

Say this first

"We're testing the screens, not you. Please think out loud as you go. You can't get anything wrong. I won't help unless you're completely stuck."

Tasks (read each one aloud)

1. **Staff, phone wireframes:** "You're a driver. Your handheld scanner is broken. Report it." (the task S1-11 requires)
2. **Staff:** "Find out whether anyone has replied to your scanner request."
3. **Agent, desktop wireframes:** "You work in IT. Find the most urgent ticket and send a reply in a friendly tone."

Notes: write down every hesitation, wrong tap or question

Tester	Task	Screen	What happened / what they said	Change to make
Example	*1*	*Submit*	*Looked for an "IT" option before typing; unsure the request would reach IT*	*Add line: "Relay sends it to the right team"*

Wireframes updated on: _____ By: _____ Keep this sheet in docs/sprints as evidence for S1-11.
