Relay style guide

What S1-12 sets up in the repo: one blue accent, Inter, an 8 px spacing scale and shadcn/ui components. All text colours pass WCAG AA.

S1-12 · Sprint 1

Core colours

Primary blue
`#0F5FB8 · --primary`
Buttons, links, active tab. White text 6.3:1

Page background
`#F4F5F7 · --background`
Behind cards

Surface
`#FFFFFF · --card`
Cards, forms, tables

Text
`#16191D · --foreground`
All main text. 17.6:1

Muted text
`#59626E · --muted-foreground`
Dates, hints. 6.2:1 on white

Border
`#DDE1E6 · --border`
Card edges; inputs use #B9C0C8

Status colours (always with words)

Received	#3D4651 on #EEF0F3 · 8.4:1	Assigned	#0B4C94 on #E7F0FB · 7.4:1
Answered	#1B6B36 on #E5F3EA · 5.7:1	Closed	#4A4F57 on #ECEDEF · 7.0:1
Needs review	#7A4D00 on #FFF3D6 · 6.6:1	Urgent	#A4231A on #FDECEA · 6.5:1
High	#8A3B00 on #FFF0E3 · 7.0:1	Medium	#3D4651 on #EEF0F3 · 8.4:1

Type · Inter

Page title — 22 / 600 (20 on phone)

Section heading — 16–17 / 600

Body text and replies — 15 / 400, line 22

Field label — 14 / 500

Input text — 16 (stops phones zooming)

Meta: reference, date — 13 / 400, muted

Spacing and shape

4	Icon to text
8	Inside small groups
12	Between list cards
16	Phone page margin, card padding
24	Desktop page margin
32	Between page sections

6 · inputs, buttons · 10 · cards · full · status pills

Components (shadcn/ui)

Primary · Secondary · Danger

Label above every field

Input, 48 px tall on phone

Error text in words, under the field

AI-drafted · check before sending

Touch targets at least 44 px · visible focus ring (2 px blue) · icons are line icons, never emoji · no gradients

For Mihlali: values for `src/app/globals.css` after `npx shadcn@latest init`

```
--background: #F4F5F7          --foreground: #16191D          --card: #FFFFFF              --primary: #0F5FB8          --primary-foreground: #FFFFFF
--muted-foreground: #59626E    --border: #DDE1E6              --input: #B9C0C8             --ring: #0F5FB8             --destructive: #A4231A
```

Keep `--background` and `--foreground` working, so the existing pages don't break. Font: Inter through `next/font/google` in `layout.tsx` (announce it, it's a shared file).
